PHOTO FROM FRONT COVER
Hotel Tortugal
On June 18

We began our monthly expedition for our Livingston Biodiversity Project. This time our objective was to visit Río Sejá, Río Ciénaga and certain tiny islands filled with nesting waterbirds that are on the east side of highway CA-13 bridge. It is the first time we have explored this area of the Municipio de Livingston for this 15-month project (obviously we have been to this area many times in other years before the start of the project, but not up-and-down Río Sejá or Río Ciénaga). We are trying to find edible wetlands plants Crataeva tapia, Diospyros nigra, and Pithecellobium lanceolatum. Also, we wish to find and photograph birds like Cochlearius cochlearius (boat-billed heron) and Nyctibius grandis (great potoo bird).

On the way driving on highway CA-9 to Izabal we could see mountains with obsidian at km 25, then cactus and Flor de Mayo in the dry forest (km 80-120 of CA-9).

Hotel Tortugal
In Río Dulce we stayed at Tortugal Boutique Hotel, Restaurant and Marina. The Hotel is located on the north shore of Río Dulce to the west of the highway CA-13 bridge over Río Dulce.

Since we know the owners of the cacao nursery and other forest products property adjacent to the hotel, we usually arrive by vehicle, passing through the town of Río Dulce then the aldea of Fronteras, Río Dulce. The normal way to arrive is to park your vehicle in the hotel parking space on the south side of the river and then the hotel lancha will bring you and your luggage to the hotel across the river. You can find more information on how to get there by entering their website: www.tortugal.com.
Hotel and Marina Tortugal is an excellent place to rest and relax, with an incredible view of Río Dulce and nearby Castillo de San Felipe. In addition, it has different piers to dock your sailboat or yacht and a floating solarium, from where you can swim in the river.
The restaurant has an extensive menu and you are sure to find food that you like. Both local and international cuisines are available, including vegan and vegetarian options. Food is served quickly by efficient and friendly staff. The restaurant area has a beautiful view of Río Dulce Bridge. In the morning you will be able to observe different species of birds flying through the place, in addition to observing the photogenic sunrise.

Hotel Tortugal
El Tortugal offers different sizes, arrangement, and styles of rooms. You can find family lodge, honeymoon lodge, lodge to be private away from everyone else.

Tortugal Hotel map
Naturally each bungalow has private bathroom, incredible views, fans, lamps, bamboo finishes, its own balcony and a lot of privacy. You can observe and listen nature from your room but also go out to explore. All rooms have views of the river or the jungle. The place is surrounded by natural beauty. Our field work team of six stayed in the Nature Lodge.
This is one of a hundred “views into the rain forest wetlands” that you see as you comfortably walk along the raised wooden walkways through the hotel property.

One of the things that makes the place so special is the treatment that each person who works in the place gives you, they make you feel at home.

We conclude this review with comments by David, one of our team:

“Tortugal Boutique River Lodge offers very good comfort and at the same time you feel you are living in a tree house. The rooms are available as double bed cabins or family size wooden houses with many beds, bathrooms and a view to the jungle and the river.

Food is delicious, well made, with local and international options. The staff is kind and is always available in case you need any extras, like towels or need to ask for anything. There is also an area for studying and reading, with many books available free to read in front of the river. I would estimate that you can also fish, because you can see many fish getting close to the dock.

Also, the owner, Daphne Becker, and the hotel managers, are keeping two lovely young dogs that interact with you when you are walking through the place, they are playful if you let them. These dogs are huge, but peaceful and friendly with each one of us.

The best part is how you feel surrounded by nature, and the certainty that you will have everything you need really close.

If you are visiting Río Dulce or on a way to Tikal or Yaxha, Peten from Guatemala City, this is the place to stay before you leave the Departamento of Izabal to enter the Peten (less than an hour from Río Dulce and then another 2 hours to get to Tikal or Parque Yaxha, Nakum and Naranjo)”.

Any school, college, university, botanical garden, zoological garden, botanical or zoological association (or club) may post this report on their web sites, (at no cost) as long as they link back to one of our web sites: either

FLAAR (in USA) and FLAAR Mesoamerica (in Guatemala) are both non-profit research and educational institutes, so there is no fee. And you do not need to write and ask permission; but we do appreciate when you include a link back to one of our sites.

Any school, college, university, botanical garden, etc. can post this PDF on their school or university or institute web site for their students to download at no cost. And you do not need to write and ask permission; but we do appreciate when you include a link back to one of our web sites.

Any web site in or related to the Municipio of Livingston, is also welcome to post this PDF on their web site (no fee). This permission includes travel agencies, hotels, guide services, etc. And you do not need to write and ask permission; but we do appreciate when you include a link back to one of our web sites.

CECON, CONAP, FUNDAECO, INGUAT, ARCAS, IDAEH, Municipio de Livingston, etc. are welcome to publish our reports, at no cost.

All national parks, nature reserves, and comparable are welcome to have and use our reports at no cost.

To publish photographs

Hellmuth’s photographs have been published by National Geographic, by Hasselblad Magazine, and used as front covers on books on Mayan topics around the world. His photos of cacao (cocoa) are in books on chocolate of the Maya and Aztec both by Dr Michael Coe (all three of editions) and another book on chocolate by Japanese specialist in Mayan languages and culture, Dr Yasugi. We naturally appreciate a contribution to help cover the costs our office expenses for all the cataloging, processing, and organization of the photos and the field trip data.

For your social media

You can post any of the FLAAR Mesoamerica PDFs about the Municipio of Livingston on your Social Media sites; you can send any of these PDFs to your friends and colleagues and family; no cost, no permission needed.

We hope to attract the attention of professors, botanical garden clubs, orchid and bromeliad societies, students, tourists, experts, explorers, photographers and nature lovers who want to get closer, to marvel at the species of flowering plants, mushrooms and lichen that FLAAR Mesoamerica finds during each field trip each month.

ACKNOWLEDGEMENTS TO FLAAR MESOAMÉRICA

The reports are a joint production between the field trip team and the in-house office team. So here we wish to cite the full team:

**Flor de María Setina** is the office manager, overseeing all the diverse projects around the world (including FLAAR-REPORTS research on advanced wide-format digital inkjet printers, a worldwide project for over 20 years). We also utilize the inkjet prints to produce educational banners to donate to schools.

**Juan Carlos Hernández** takes the material that we write and places it into the pertinent modern Internet software to produce our web pages (total network is read by over half a million people around the world).

**Paulo Núñez** is a webmaster, overlooking the multitude of web sites. Internet SEO changes every year, so we work together to evolve the format of our web sites.

**Valeria Áviles** is an illustrator for MayanToons, the division in charge of educational materials for schools, especially the Q’eqchi’ Mayan schools in Alta Verapaz, Q’eqchi’ and Petén Itzá Maya in Petén, and the Q’eqchi’ Mayan and Garifuna schools in the municipality of Livingston, Izabal.

**Josefina Sequén** is illustrator for MayanToons and also helps prepare illustrations for Social Media posts and for animated videos.

**Rosa Sequén** is also an illustrator for MayanToons and also helps prepare illustrations for Social Media posts and for animated videos.

**Laura Morales** is preparing animated videos in MayanToons style since animated videos are the best way to help school children how to protect the fragile ecosystems and endangered species.

**Andrea de la Paz** is a designer who helps prepare the master-plan for aspects of our publications. She is our editorial art director

**Senaida Báez** is photography assistant for many years. She knows the Canon, Nikon and is learning the two new Sony mirrorless cameras. She prepares, packs, sets-up, and helps the photographers before, during, and after each day’s field trip.

**Jaqueline González** is a designer who puts together the text and photographs to create the actual report (we have several designers at work since we have multiple reports to produce).

**Roxana Leal** is Social Media Manager for flora and fauna research and publications, and MayanToons educational book projects

**Sergio Jerez** prepares the bibliography of each topic and downloads the pertinent research material for our electronic library on flora and fauna. We all use these two downloads plus our internal library on Mesoamerican flora and fauna (Mexico through Guatemala to Costa Rica).

**Heidy Alejandra Galindo Setina** joined our design team in August 2020. She likes photography, drawing, painting, and design.

**Maria José Rabanales** she is part of the team for editing photographic reports and educational material of Flora and Fauna since September 2020. She works together with others of the team to prepare the finished pdf editions of the material of the Yaxha, Nakum and Naranjo Project.

**Alejandra Valenzuela** biology student is now part of Flora y Fauna’s photographic report and educational material editing team since September 2020.

**Alexander Gudiel** designer who join the editorial design team on December 2020. He will combine the text, pictures and maps into the FLAAR Mesoamerica editorial criteria.

**Cristina Ríos** designer student who join the editorial design team on December 2020. He will combine the text, pictures and maps into the FLAAR Mesoamerica editorial criteria.

**Carlos Marroquín** is a USAC graphic design student who volunteered to do his professional practice with the Editorial Design Team. We are very grateful with people like him who join our team and bring his knowledge and work.
