Livingston: the Caribbean biodiversity wonderland of Guatemala

Seleccionar idioma ▾

Con la tecnología de  Traductor de Google

Izabal, one of the regional departments of Guatemala that offers a variety of recreational activities, is home to numerous nature parks and diverse natural landscapes. There are white sandy beaches a short boat trip away, with tall jungle-covered mountains in the background, and the Mesoamerican Reef System in the Caribbean Sea on the horizon in front of you. Mangrove swamps and cattails abound along the Guatemalan coast (and island on all shores of the Rio
