Rain Forests, Rivers, Lakes, Bays, Oceans, and Lagoons:

Livingston: the Caribbean biodiversity wonderland of Guatemala

Seleccionar idioma ▾

Con la tecnología de [Google Traductor de Google](#)

Izabal, one of the regional departments of Guatemala that offers a variety of recreational activities, is home to numerous nature parks and diverse natural landscapes. There are white sandy beaches a short boat trip away, with tall jungle-covered mountains in the background, and the Mesoamerican Reef System in the Caribbean Sea on the horizon in front of you. Mangrove swamps and seagrass abound along the Guatemalan coast (and inland on all shores of the Rio
