There are two angles to study the details. The front cover view shows the Quadriparte Badge Headdress details best. Early Classic art of Peten has a lot to offer for research potential.

This is a good angle to see the Quadripartite Badge Headdress across the top.

Totally different much earlier style face on the lid of this low cache vessel. But the side of the cache vessel is pure traditional Early Classic Tzakol incised face.

Early Classic (from the incised face on the side of the lid and base), Peten. The design on the top is different style completely. A rare size of cache vessel. Our goal is to make these available to students and scholars so they can study them. FLAAR Photo Archive.
